

2036: A Possible Future (A New World Book 1)

The story that follows is based on an imagined series of conversations with my five year old Grandchild that takes place in the year 2036. In the conversation we discuss some of the major topics that affect the world, and explore some of the things we are doing today and asking the simple question - why? From war to education and from children to homes we get a glimpse of how things can be in the future if we all work together for the common good. I hope it will entertain and inspire you and get you to think in a totally different way, Most of all I hope you will be able to see yourself in the questions that are asked and it will really help you to take the step to become the greatest version of yourself that you can be. .

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
