

## Trade and Health: Seeking Common Ground

Seeking improved health and increased income have long been common goals. Those who make the case that free trade will help everyone argue that the growth from increased trade will be shared and will improve peoples lives. But they have not answered the fundamental question of how to formulate trade policy to simultaneously achieve growth and benefit health. Trade and Health answers this question by exploring the entire array of avenues through which trade affects health, and examining a number of case studies on how best to achieve policies that integrate health objectives. The contributors represent the full range of stakeholders in the trade-health debate - medical professionals, civil society representatives, academics from a range of disciplines, and negotiators and policy-makers at the national and global levels.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
