

## Space Encounters II: Chunking Down the 21st Century

Anyone exploring experiential and historical treatment of human potential and the Unconscious History of the Earth will be interested in this book. The intent of the Space Encounters series is to break the umbilical cord that connects us to the single experience, of linearity, called Time. It encourages the readers own intuition. Investigating unconscious chaotic threads of Event bytes, or quanta, the Space Encounters series, put together as through the loom of Penelope, follows the voyage of the Earth itself through passages of the past (put into modern light), to the docking point where some new principles emerge. Profuse with a special feature, which is the unprogrammed printouts that shifted the appearance of some pages on the screen, it has beautiful scans in black and white called computer-PK. That is, mind through matter. Sometimes a fragment of a scan is finished on the next page - reading the two pages in reverse order. This book will require you to think. It is perfect for those who like inspirational, motivational New Thought (including popular Quantum Mechanics), plus artistic experimentation with presentation. Additionally, there is the out-of-the-ordinary spiritual experience. The book encourages each individual to explore his/her own potential and life experience, sometimes talking to the reader directly. It illustrates how to give up preconceptions when a major shift, surprise or opportunity for testing information personally comes along. Peak experiences, Exceptional Human Experience, Eastern mysticism and particle physics are all part of the modern consciousness, and in such a climate, Harrell illustrates how to fearlessly develop ones own individual vision and contribute ones hard-tested personal truth. Such a vision was lived, to produce this book series.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and

more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
