

Nod Factors and Nodulation Process by Rhizobia in Cicer Arietinum

This is the best book to understand the molecular mechanism of nodulation in legumes especially in Cicer aritinum. Chapters are dedicated to explain the theoretical as well as practical knowledge of the role of nod factors and nod genes in nodulation process. This work is based on the results of research carried out by the author and his team at various research labs in India. This book is also suited for those students who are working with legumes especially Cicer arietinum.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
