

Trade Liberalisation and Poverty in South Asia (Routledge Studies in the Growth Economies of Asia)

The link between trade liberalisation and poverty has arguably been one of the most debated topics in development policy debate. Existing studies on the subject have primarily used multi-country cross-sectional data, and there is a growing concern about the limitations of this approach in providing a sound empirical basis for informing the policy debate. These limitations point to the need for undertaking in-depth analyses within individual countries over time. In order to examine the connection between trade liberalisation and poverty, this book provides case studies of trade policy reforms and poverty reduction outcomes of seven countries in South Asia - Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka. The South Asia region allows for an excellent comparative study given the widespread emphasis on liberalisation reforms in the region over the past two decades, as well as highlighting significant inter-country differences in terms of the timing and comprehensiveness of reforms, and the heavy concentration of world poverty in the region. This book is a useful contribution to studies on South Asia, as well as International Trade and Development Economics.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
