

Dynamic Vocabulary Development in a Foreign Language (Linguistic Insights)

The Dynamic Systems Theory perspective offers new lenses to probe into long-term foreign language development. This book reports on findings of a longitudinal multiple-case study on the vocabulary development of eight university-level Chinese learners of English. Framed within the Dynamic Systems framework, the study assumes a holistic perspective towards vocabulary knowledge and aims to project a comprehensive picture of vocabulary development in a typical foreign language learning setting such as the Chinese context. To this end, a wide array of quantitative measurements and qualitative methods was employed. In-depth examination was given to both psycholinguistic and sociocultural processes involved in the complex and dynamic development of vocabulary knowledge. Efforts were also made to establish meaningful links between the learners cognitive, mental, pedagogical and social contexts. Although the focus is on vocabulary development, what is discussed in the book is applicable to a wide range of topics in foreign language learning and development.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
