

Symptoms in the Pharmacy: A Guide to the Management of Common Illnesses

Symptoms in the Pharmacy is the indispensable guide to the management of common symptoms seen in the pharmacy. Designed for quick and easy reference with separate chapters for each ailment, each chapter incorporates a decision making framework in which the information necessary for treatment and suggestions on when to refer is distilled into helpful summary boxes. Decision making support is provided in cases involving ethical dilemmas. It also includes example case studies providing the view of pharmacists and doctors and, in their own words, patient perspectives of what it is like to live with and manage conditions such as migraine and eczema. These easy-to-follow chapters can be read cover to cover or turned to for quick reference. This seventh edition covers the availability of new medicines and includes new sections and case studies for POM to P switches. It continues to draw upon the latest evidence for treatment guidelines and includes expanded coverage of common infectious diseases and important safety advice on the use of medicines in children. It also features colour photographs of skin conditions enabling the differentiation and diagnosis of common skin complaints. With advice from a pharmacist and GP author team, Symptoms in the Pharmacy covers ailments which will be encountered in the pharmacy on a daily basis and should be kept close at hand for frequent consultation.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
