

Assessing Visual Rhetoric: Problems, Practices and Possible Solutions

Revision with unchanged content. The proliferation of computers in classrooms allows students to insert images, texts, graphics, movies, and audio files easily into their electronic works or documents. There is a sense that our culture is a visual culture, but what does that mean in terms of assessment practice? What do we really value about images? What is the relationship between images and texts? This study examines the problems of assessment within a university level first year composition course. The analysis relies on a traditional grounded methods approach and a concept mapping approach to mutually inform the results and conclusions. The aim of the study is to uncover the actual criteria and standards valued by instructors when confronted with the complexity of the new media compositions. The study is designed to be of interest to educational professionals from administration with interests in assessment theory and practice to classroom instructors of any field whose students are now submitting electronic compositions with texts and images.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
