

The Construction of Mental Representations During Reading

This volume presents in-depth investigations of the processes of meaning-making during reading at both local (discourse) and global (general knowledge) levels. It considerably extends our knowledge of how mental representations are constructed and updated during reading. The book also provides insight into the process of representation construction by using online measures and relating this process with final memory representations; provides detailed models of these processes; pays attention to the coordination of multiple representations constructed; focuses on the monitoring and updating of mental representations; and applies all this knowledge to richer and more complicated texts than are often used in laboratories.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
