

Positive Leadership: Strategies for Extraordinary Performance

Prescriptions for leading organizational success are plentiful, often provided by well-known senior executives, political candidates, and consultants. The objective of this book is different. It aims to explain strategies that can help leaders reach beyond ordinary success to achieve extraordinary effectiveness, spectacular results, and positively deviant performance. It does so by relying on validated findings from empirical research. The book is based on analyses of organizations that have achieved exceptional levels of success. One such study, for example, chronicles the cleanup and closure of a nuclear weapons production facility (Cameron & Lavine, 2006). The company receiving the contract to dismantle and clean up the Rocky Flats Nuclear Arsenal completed the assignment 60 years ahead of schedule, \$30 billion under budget, and 13 times cleaner than required by federal standards. This company's achievement far exceeded every knowledgeable experts predictions of performance, and it represents what I refer to as positive deviance. Carefully examining organizations such as this one has helped uncover some atypical leadership strategies that enable levels of performance that dramatically exceed expectations and reach extraordinary levels of excellence. ---Preface

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
