

The Cultivation of Whiteness: Science, Health, and Racial Destiny in Australia

The Cultivation of Whiteness is an award-winning history of scientific ideas about race and place in Australia from the time of the first European settlement through World War II. Chronicling the extensive use of biological theories and practices in the construction and protection of whiteness, Warwick Anderson describes how a displaced Britishness (or whiteness) was defined by scientists and doctors in relation to a harsh, strange environment and in opposition to other races. He also provides the first account of extensive scientific experimentation in the 1920s and 1930s on poor whites in tropical Australia and on Aboriginal people in the central deserts. [Anderson] writes with passion, wit, and panache, and the principal virtues of The Cultivation of Whiteness are the old-fashioned ones of thoroughness, accuracy, and impeccable documentation. . . . [His] sensitive study is a model of how contentious historical issues can be confronted. W. F. Bynum, Times Literary Supplement One of the virtues of The Cultivation of Whiteness is that it brings together aspects of Australian life and history that are now more often separated: race and environment, blood and soil, medicine and geography, tropical science and urban health, biological thought and national policy, Aboriginality and immigration, the body and the mind. The result is a rich and subtle history of ideas that is both intellectual and organic, and that vividly evokes past states of mind and their lingering, haunting power. Tom Griffiths, Sydney Morning Herald

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
