

The Design and Construction of the British Library

The British Library at St Pancras, the major public monument built in the United Kingdom in the twentieth century, opened to the public in April 1998. Professor Sir Colin St John Wilson has spent the greater part of his working life on the project from 1962 onwards when various schemes for a building adjacent to the British Museum were proposed, through to the completion phase of the present design. Formerly Head of the Department of Architecture at the University of Cambridge, and the author of two important books on the history and theory of twentieth-century architecture, he is uniquely placed to give both an account of the development of the design concept of the building and to tell the story of its construction. No other project in Britain since the building of St Pauls Cathedral (which also took thirty-six years to reach completion) is comparable in time-scale or the magnitude of controversy surrounding it. This book reveals how Professor Wilson and his team responded to successive changes in the Brief, whilst determinedly maintaining a commitment to the very highest quality in all aspects of a building designed to last 250 years. Illustrated with many original drawings and specially commissioned photographs, it will appeal to anyone interested in modern architecture.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
