

Awake to the Awakening

There is an awakening. It is said by many to be a voice without. It is something that will occur and be seen in the physical world. How we live will determine whether we become a part of or separate from it. Will it come through the morning, day or cusp of the night? Is it marked into our calendars of the year? Why did time control when it was to happen? Was it waiting for the right timing? Did it exist eternally or arrive in a day? Have I been living life with rose-colored glasses? These questions were a conscious concern and at the top of my list. It came about in a manner described as a spiritual calling. An experience I dare not put forth into words, until now.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
