

Pathways Through Science: Control and Communication - Teachers Guide (Nuffield Modular Science)

The Pathways Through Science series provides workable strategies for tackling the problem of differentiation. The resources have been designed to match the NEA/WJEC/ULEAC modular GCSE. They can also be organized for use with any other GCSE programme. Each of the 13 modules consists of five elements: activities; sourcebook; study guide; commentary; and teachers guide. The activities provide photocopiable material. Each module is divided into five or six episodes comprising a series of related activities. Each episode requires between two and four double periods. The sourcebook is a colour magazine-style book. It provides scientific information and data needed for the activities. Emphasis is placed on the human, social and global contexts for scientific investigation. The study guide acts as the students map through the module and also their personal record of achievement. Through using the guide students are encouraged to take more responsibility for their own learning. The commentary book contains help, hints and answers and is used by students to support their work in the activities in an independent way. By making full use of the commentary, students should be able to check out their decisions, responses and outcomes. Finally, the teachers guide includes technical notes, an annotated version of the students module map, plus examples of worthwhile routes through each episode for all students, at whatever level they are working.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
