

# Transitions: The Mormon Migration from Religion to Relationship

Transitions is designed to be used in a variety of formats and venues. You may find yourself as part of a small group meeting in a church or a home, or you may be working through this resource as an individual in the privacy of your home or other study area. Regardless of your situation you will find that the video segments for each chapter fit well with the written materials. In the written materials for each of the chapters you will find stories combined with questions for personal reflection and study. These can be used by individuals, as well as serve as conversation starters for small group leaders. If you find yourself working through Transitions as an individual, we strongly encourage you to share your experiences and journey of immigration with others as soon as possible. This will make the process easier to work through as you travel with others who share your experiences.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
