

Immunology of Sexually Transmitted Diseases (Immunology and Medicine)

Twelve contributions present clinicians and pathologists with current immunological developments on the subject. Space has also been devoted to drug allergy relevant to treatment of STD and to discussion of the roles of clinician and pathologist in future research. Annotation copyright Book News, Inc

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
