

Progress in Drug Research / Fortschritte der Arzneimittelforschung / Progres des recherches pharmaceutiques

Volume 28 of Progress in Drug Research contains 8 articles, a subject index for this volume, an alphabetic subject index for volumes 1-28, and an author and subject index for all the volumes which have so far been published. The contributions of volume 28 are particularly concerned with biogenic amines, with immunology and the pharmacology of the immune system, with antiviral agents, with amino-quinoline antimalarials, with the axoplasmic transport, with drug treatment of asthma and with the role of adipose tissue in the distribution and storage of drugs. The authors have tried, and I think they have succeeded, not only to summarize the current status of particular fields of drug research, but also to provide leads for future research activity. The articles of this volume will be of special value to those actively engaged in drug research, and to those who wish to keep abreast of the latest developments influencing modern therapy. In addition, it is believed that the 28 volumes of Progress in Drug Research now available represent a useful reference work of encyclopedic character. The editor would like to take the occasion of the publication of this volume to express his gratitude both to the authors and to the readers.

We've started our countdown to National Handbag Day on October 10, and that means we'll have special features for you every day, right up to the big event! Today, we're here to talk about the intersection of celebrity and accessories, and more specifically, how the two can become intertwined in public consciousness for years. The kinds of stars who carry a particular bag do a lot to shape the market's perception of it and the designer who created it, which is why so many brands give out free bags to stars now: they're hoping to create positive associations. In the cases you see below, though, things came along a little bit more naturally. You can't rush love, after all. Think of a bag-celeb duo we missed? Let us know in the comments!
